PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building scalable web applications end-to-end using PHP, Laravel, Node.js, React.js, and MySQL. Skilled across the full stack — from RESTful API design and database architecture to responsive, accessible front-end interfaces. Delivered production systems spanning government, healthcare, e-commerce, real estate, and SaaS domains, with hands-on experience in the MERN stack, payment gateway integration, and AI-powered feature development using OpenAI, Claude, and Gemini.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), jQuery, AJAX, HTML5, CSS3, Bootstrap
- **Backend:** Laravel, PHP, Node.js, Express.js, REST APIs, JWT, Laravel Sanctum, Laravel Passport, RBAC, MVC
- **Database:** MySQL, MongoDB, Firebase
- **AI:** OpenAI API, Google Gemini API, Claude API
- **Integrations:** Razorpay, Stripe, PayPal, CCAvenue, Paytm,
- **Tools:** Git, GitHub, Docker, Postman, CI/CD, VS Code

DOMAIN EXPERTISE

- Government Sector
- Healthcare
- E-Commerce
- Real Estate
- Astrology
- SaaS ERP

BY THE NUMBERS

4+ Years Experience | 20+ Full-Stack Projects Delivered | 15+ Client Engagements | Up to 40% Query Performance Improvement

WORK EXPERIENCE

Senior Software Engineer — Akiko Sherman Infotech Pvt. Ltd., New Delhi, India Nov 2025 – Present

- Architect and build the full-stack Laravel backend and frontend for the NPPA government portal (nppa.gov.in), ensuring compliance with government security standards and regulatory guidelines.
- Designed RBAC and audit logging across 5+ user roles, reducing unauthorized access incidents and meeting national data compliance requirements.
- Built a WCAG-accessible frontend using HTML, CSS, Bootstrap, and AJAX, improving cross-device usability for citizen and admin users.

PHP Laravel Developer — Invoidea Technology Pvt. Ltd., New Delhi, India Mar 2022 – Oct 2025

- Developed 20+ full-stack projects and services for web and mobile clients, improving integration efficiency and maintainability across 15+ client engagements.
- Integrated 5 payment gateways (Razorpay, Stripe, PayPal, CCAvenue, Paytm), enabling reliable transaction processing across multiple client platforms.
- Refactored MySQL query logic and redesigned database schemas, cutting query execution time by ~40% and improving application throughput.

- Collaborated cross-functionally to ship full-stack features (Laravel backend + React/Bootstrap frontend) across 4+ client projects — e-commerce, real estate, and astrology — following Agile sprint cycles.

KEY PROJECTS

Healthcare Appointment Management System — MERN Stack

- Developed a full-stack healthcare appointment platform enabling doctor discovery, appointment scheduling, and availability management.
- Implemented patient medical record access across 3 user roles with secure, authenticated RESTful APIs.
- Designed an adaptive user interface and scalable backend architecture to support end-to-end healthcare workflows.

NPPA Government Portal — Laravel, PHP, MySQL, Bootstrap (nppa.gov.in)

- Built a compliant, high-availability Laravel backend and cross-browser UI supporting 10,000+ monthly users.
- Ensured secure data handling and performance optimization, supporting 99%+ uptime for a live public sector portal.

Yards India — Real Estate Portal | Laravel, React.js, REST API (yardsindia.com)

- Developed the backend Admin Panel using Laravel with secure authentication and multi-tier login access (Admin, Agent, User).
- Designed and developed RESTful APIs to power the React.js frontend application, reducing average API response time.

Workerman — SaaS ERP & Business Management Platform

- Implemented 6 core modules — CRM, HRM, Office Management, Project Management, Recruitment, and Support — with mobile-first interfaces for 100+ subscribing businesses.

Sagetalkz — Astrology Platform | Laravel, REST API, Firebase (sagetalkz.com)

- Built a secure Laravel backend with real-time Chat and Call functionality using Firebase for 1,000+ active users.
- Created custom REST APIs integrating Astrologer and User mobile applications.

CERTIFICATIONS

- Node.js Development Certification — Udemy (45-day professional course covering REST APIs, authentication, database integration, and scalable application architecture).

EDUCATION

B.Tech, Computer Science — Madhu Vachaspati Institute of Engineering & Technology (AKTU) (Graduated 2025 | CGPA: 7.9/10)

Diploma, Computer Science — Government College (BTEUP) (2021 | 80%)
